

There is no hard evidence that cell phone use does not interfere with navigational instruments.

Cell phone use would enable terrorists to coordinate a plan of action more effectively.

The NPRM would leave it up to flight attendants to police the use of cell phones onboard the aircraft compromising our ability to maintain a safe, secure cabin environment and to conduct emergency evacuations.

IT WOULD MAKE AN ALLREADY TENSE CABIN ENVIRONMENT MORE STRESSFUL.

People do not use cell phone etiquette on the ground. I could not imagine being twelve inches away from them.
